Evac Horizon

Vacuum drainage system

Benefits

- Compact size
- Reduction of construction schedule and cost
- Construction flexibility
- Elimination of underground
- System redundancy
- Proven reliability
- Cost effective
- Low maintenance

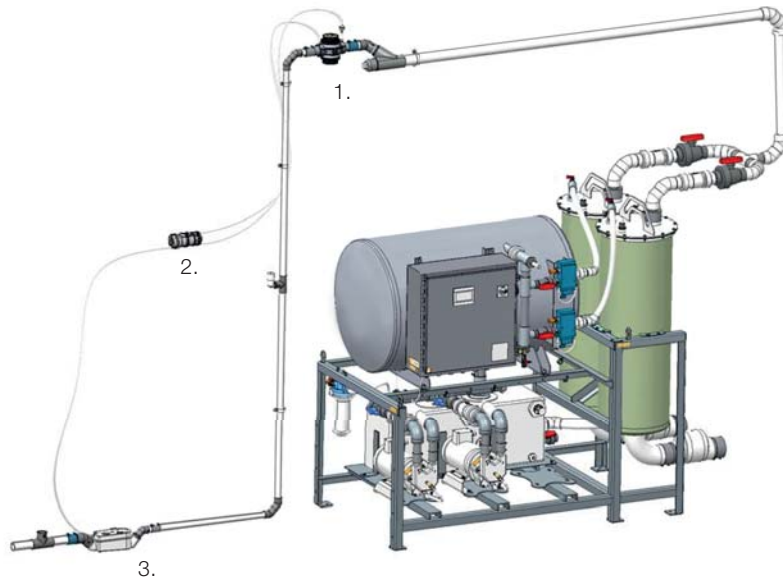

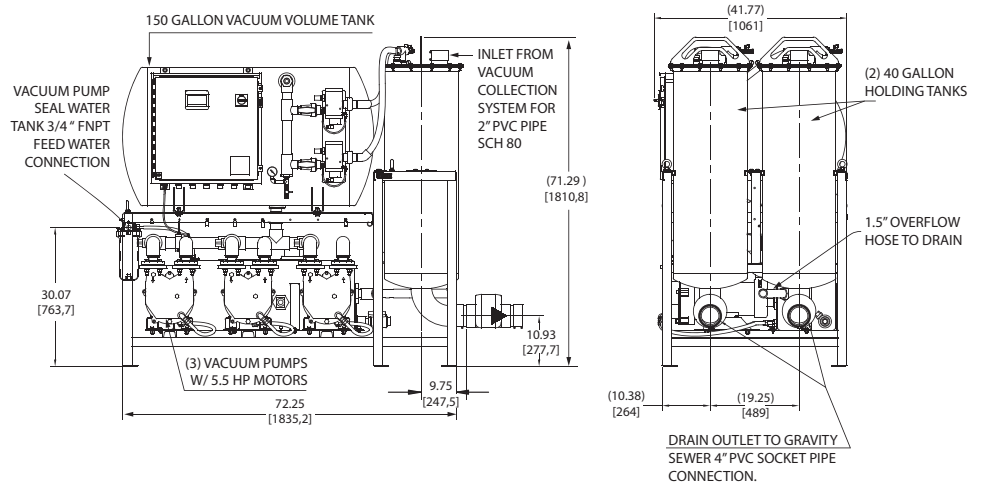

Evac Horizon

Evac vacuum drainage systems deliver many advantages and benefits beyond the capabilities of traditional gravity plumbing. The Evac Horizon systems eliminate frequent construction obstacles occurring with gravity drainage; including invert issues, trenching, core drilling, vent piping, and more. It is engineered to provide efficient, reliable, low-maintenance operation, while providing the greatest flexibility, reducing downtime, shortening construction schedules, and minimizing disruption for supermarket installations.

Evac offers a complete line of drainage systems designed and configured to deliver high-value, cost-effective solutions to your project of any size – from large new construction projects, to remodeling an existing floor plan, rapid equipment relocation, or developing a 2nd use facility. As the global leader in Vacuum Drainage Technology, Evac has helped its customers to achieve their construction goals on over a thousand projects.

Contact Evac North America for technical data on the Horizon system.
